AudiCable Audio Recorder for Windows

Tutorials

- . Choose the Desired Music Platform
- . Customize Output Settings
- . Add Tracks/Playlist to AudiCable
- . Start Music Conversion
- . Check Recorded Music
- . Tags Editor
- . Formats Converter
- . CD Burner
- . AA/AAX Converter

Choose the Desired Music Platform

On the start-up interface, please select the target music service and the download mode. We start with an example of "**Spotify App**" here..

AudiCable Audio Recorder for Windows

Customize Output Settings

Click **"Settings"** in the bottom left. Choose Output Format (MP3 / AAC / FLAC / WAV / AIFF / ALAC), Output Quality (320kbps, 256kbps, 192kbps, 128kbps), Convert Speed, Output Path and others. For better organizing your music library, you can create a new local folder to save the output audio files.

AudiCable Audio Recorder for Windows

Add Tracks/Playlist to AudiCable

You can directly drag & drop the playlists from the app to AudiCable. Or copy & paste the playlist link to the URL parsing box of the AudiCable. Then tick the songs you want to convert in the queue, click "Add".

Note: If you choose to download music via the **Web Download Mode**, you can directly open a Spotify playlist, album, or artist on the web player, then tap "Click to add" button to parse music.

AudiCable Audio Recorder for Windows

Start Music Conversion

Click the **"Convert"** button, AudiCable will start converting songs to the local drive. The recording process will be finished soon. If you want to stop the conversion, just click **"Abort"**.

AudiCable Audio Recorder for Windows

Check Recorded Music

Once converted, tap **"Converted"** on the left tab, then click a **"Folder"** icon behind any song. You can find converted audio files as the local folder pops up. If you want to delete the download history or audio files from the local folder, right-click and select **"Delete"**.

AudiCable Audio Recorder for Windows

Tags Editor

To convert the local tracks to other audio formats, go to **Tools > Edit Tags**. Edit its cover, title, artist, album, genre, year and track number according to your needs. Later click **Save** to apply all changes.

AudiCable Audio Recorder for Windows

Format Converter

To edit tag information of a song, go to **Tools > Format Converter**. Click **+Add** icon to import music from the computer, then set up the output format.

AudiCable Audio Recorder for Windows

CD Burner

To copy and burn music to your CD, go to **Tools > Burn CD**. Insert a blank disc into your CD or DVD burner. Click the **"Burn"** button to start burning.

AudiCable Audio Recorder for Windows

AA/AAX Converter

To convert local AA/AAX files, go to **Tools > AA/AAX Converter**. Drag and drop the local audiobooks to the parsing zone. Later select the Output Format, Output Quality and Output Folder to apply the changes.

AI Audio Splitter

To remove vocals from any audio, click **Audio Optimize** on the left panel. Click the +Add button to import audio files, then the AI tool automatically separates vocals out of songs while keeping high audio quality.

Podcast Downloader

The built-in podcasts downloader supports playing and converting popular podcasts to local MP3, MP4, or other formats. Click **"Podcasts"** on the left panel, select the episode by genre, or directly query the show in the search box. Then click the download button, AudiCable will free download podcasts to computer at a fast speed.

Radio Recorder

The easy-to-use radio downloader effortlessly records online radio shows as MP3, AAC, FLAC, WAV, AIFF, and ALAC. Click "Radio" on the left panel, filter the radio station by country, or directly enter the radio name in the search zone. Then click the Click to Record button, AudiCable will download internet radio to the computer.
