Purchase & Registration

. Purchase License
. Registration Tips

PurchaseAudiCableAudio RecorderOnefor Mac

Quick Link: To purchase a license key for AudiCable Audio Recorder for Mac, click here.

1. Why should I buy AudiCable Audio Recorder for Mac?

The trial version of AudiCable Audio Recorder for Mac is limited to converting the initial one minute of each audio file. To get around the restriction, a licence key is required. You will receive a confirmation email containing your registration ID and product key, which are required to access the complete version of the software, once you have purchased it.

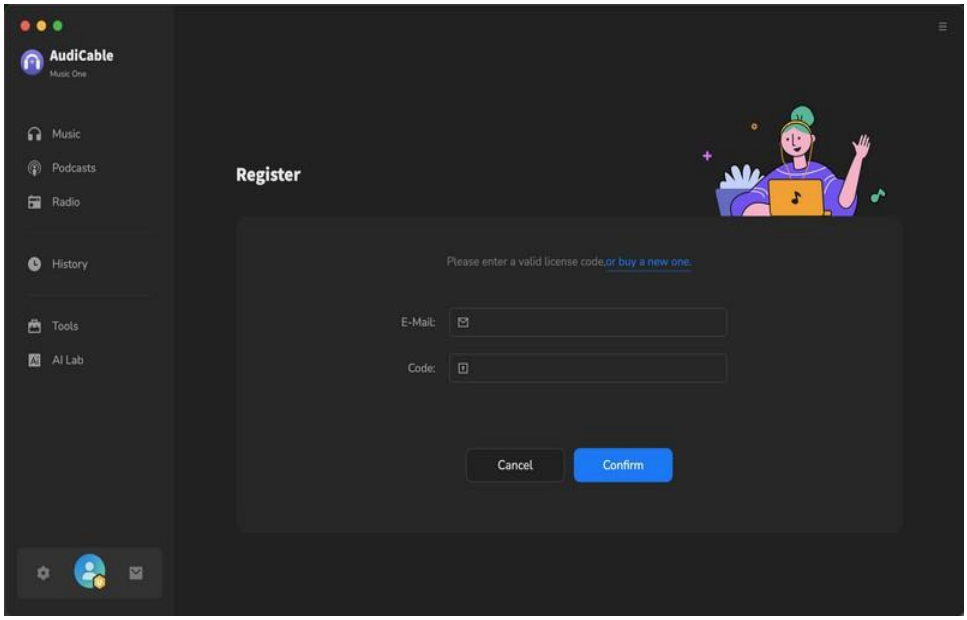
2. How can I benefit from purchasing a license?

- Full music conversion from all supported streaming music platforms.
- FREE technical support.

RegisterAudiCableAudio Recorderfor Mac

Step 1: Start AudiCable Audio Recorder on your Mac.

Step 2: Please click the "**Profile**" icon (on the bottom left). There will be a registration popup dialog, where you can copy and paste the registration email and license code.



Notice:

1. Please make sure you've purchased a correct license to unlock the limitations of the trial version. You can't use the license for Mac to activate the Windows version.

2. The registration information is case sensitive. Please do not add blank at the beginning or at the end of the registration e-mail and code.

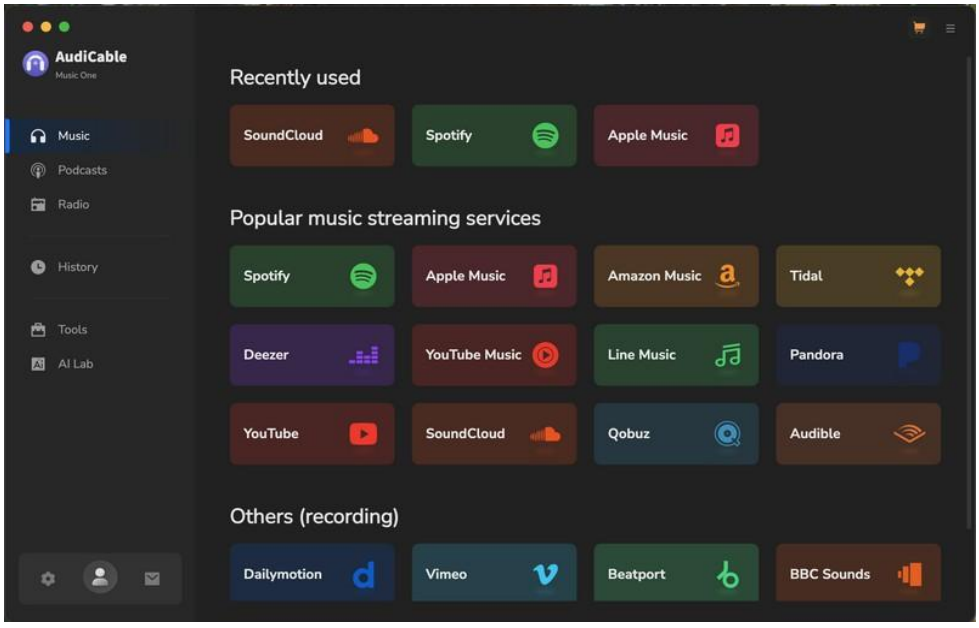
Tutorials

. Choose Music Platform and Download Port
. Adjust Output Settings
. Add Spotify Playlist to AudiCable
. Start Music Conversion
. Check Converted Music
. Use Tags Editor
· Use Audio Editor
. Use Formats Converter
. Use AA/AAX Converter
. Use AI Audio Splitter
. Use Podcast Downloader
. Use Radio Recorder

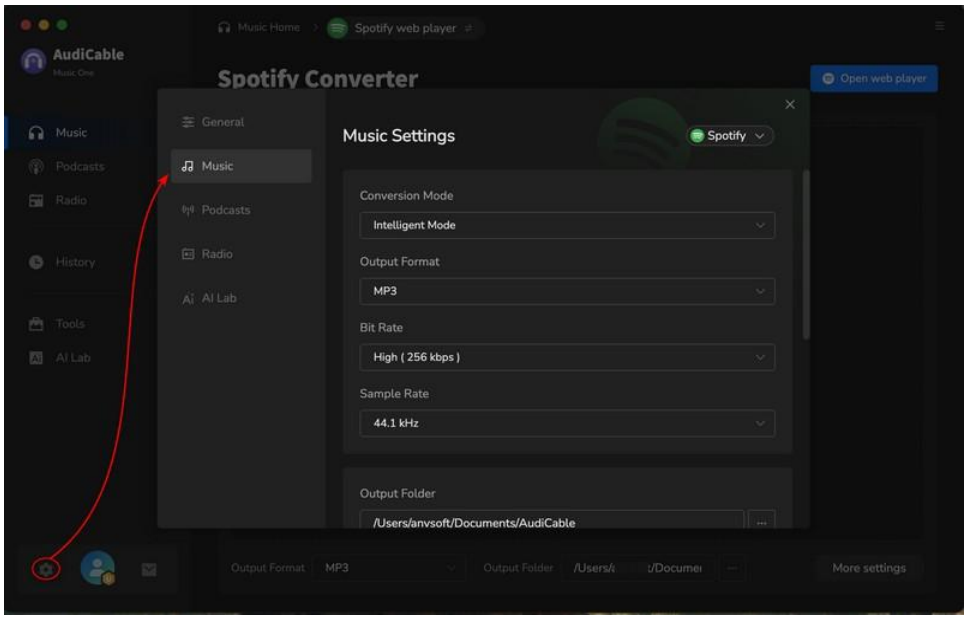
Choose Music Patformand Download Port

Run AudiCable Audio Recorder program on your Mac. Then choose the target music platform on the Music tab. Let's start with "**Spotify**" and log in to your Spotify account.



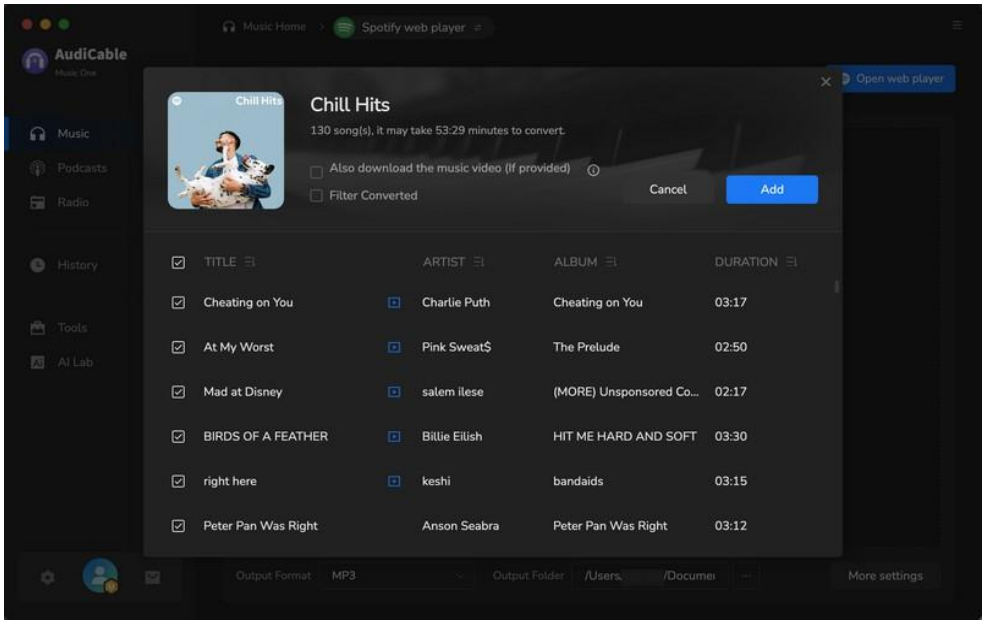
Adjust Output Settings

Go to "**Settings**". Select Output Format (MP3 / AAC / FLAC / WAV / AIFF / ALAC), Output Quality (320kbps, 256kbps, 192kbps, 128kbps), Convert Speed, Output Path and others. For better arrange your music collection., you can make a new folder on your computer to store the output audio files.



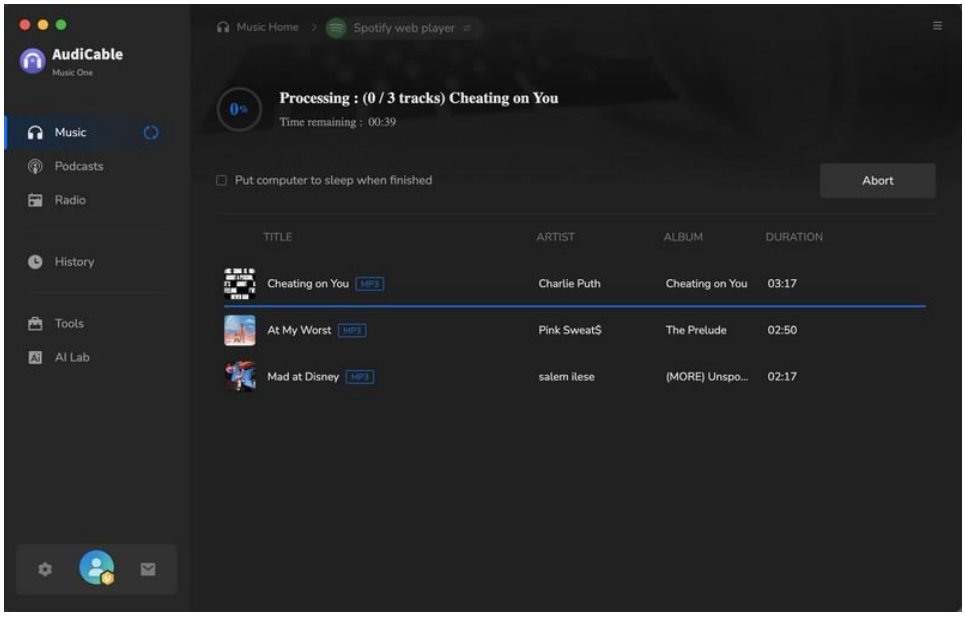
Add Spotify Playlist to AudiCable

Navigate to your Spotify playlist, album or artist on the web playerwindow, then click the suspending "**+**" button. With the songs selected in the conversion list, click "**Add**".



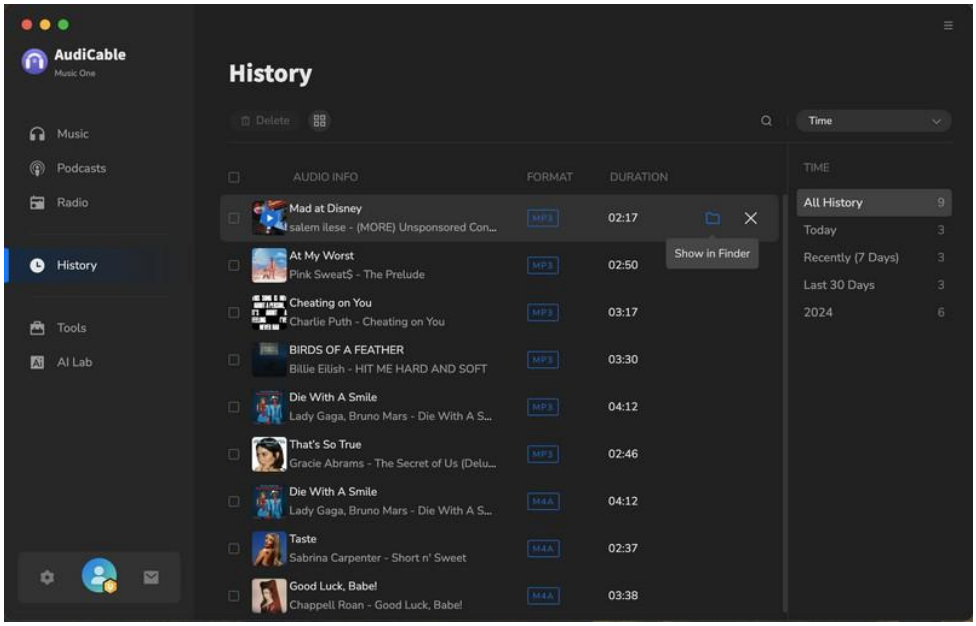
Start Music Converion

Click the **"Convert"** button and the program will start the conversion process immediately. You can see the conversion process on the "**Converting**" interface. To stop the conversion, just click "**Abort**".



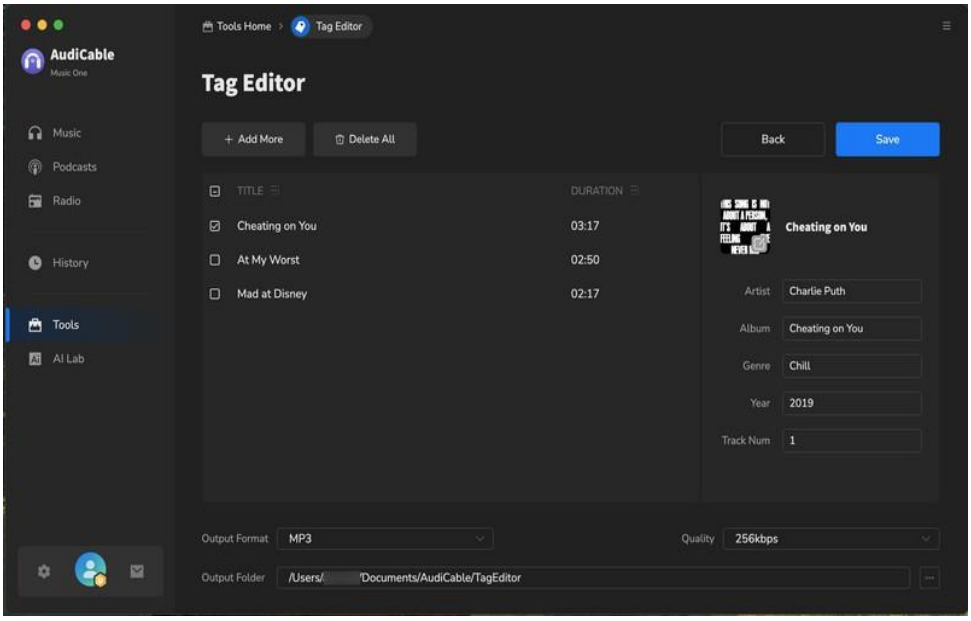
Check Converted Music

When the conversion is done, you can browse the conversion history by clicking "**Histroy**" on the left. Hovering over the song, and clicking the small "**Folder**" icon, then you'll be redirected to where the downloaded audio files locate.



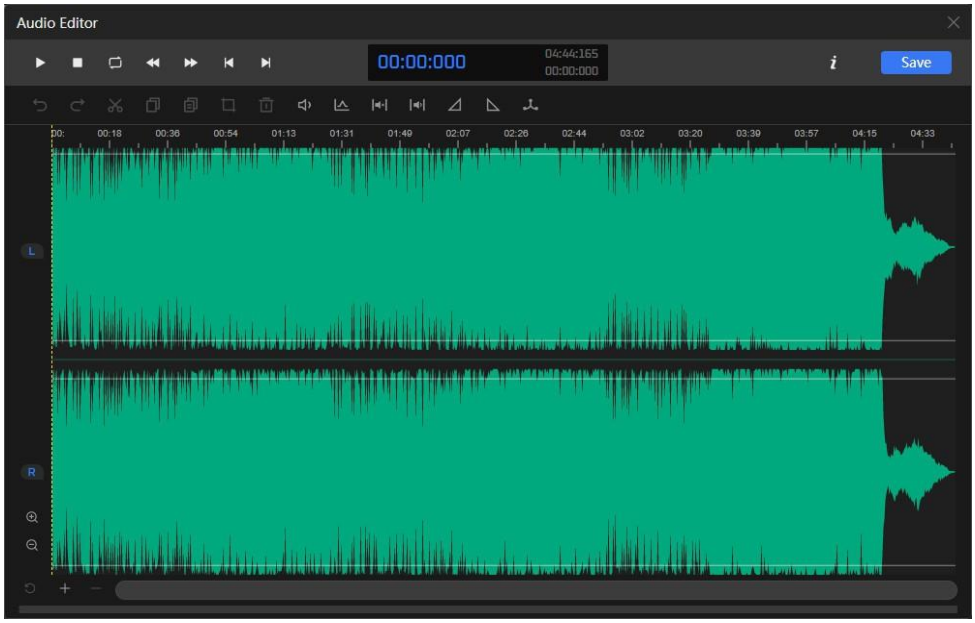
Use Tags Editor

To edit tag information of a song, go to **Tools > Edit Tags**. Edit its cover, title, artist, album, genre, year and track number according to your needs. Later click **Save** to apple all changes.



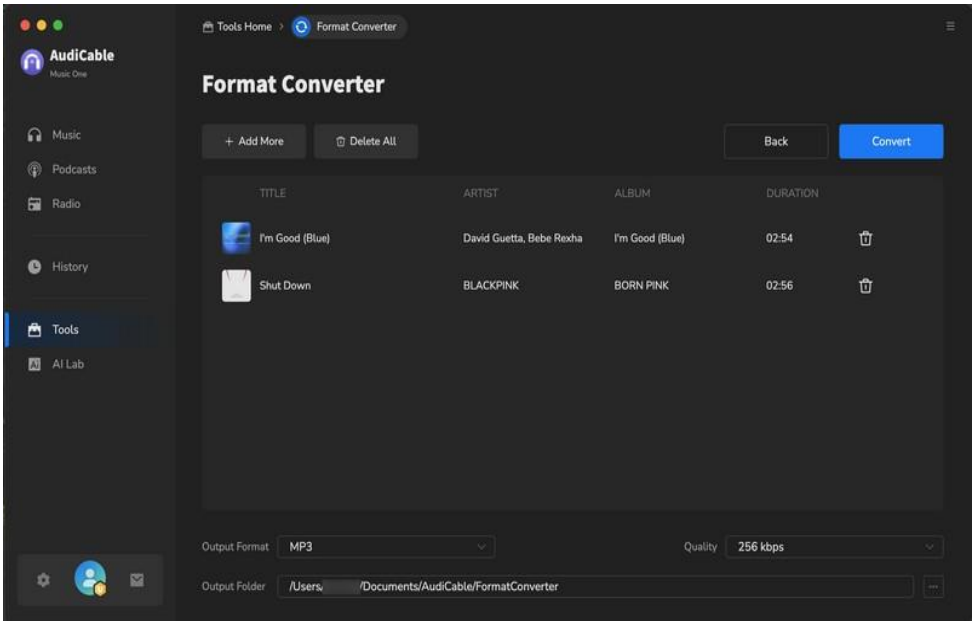
Use Audio Editor

Go to **Tools > Audio Editor**. Here you can trim and merge audio sections, increase/decrease loudness, and add fade-ins/fade-outs for smooth transitions.



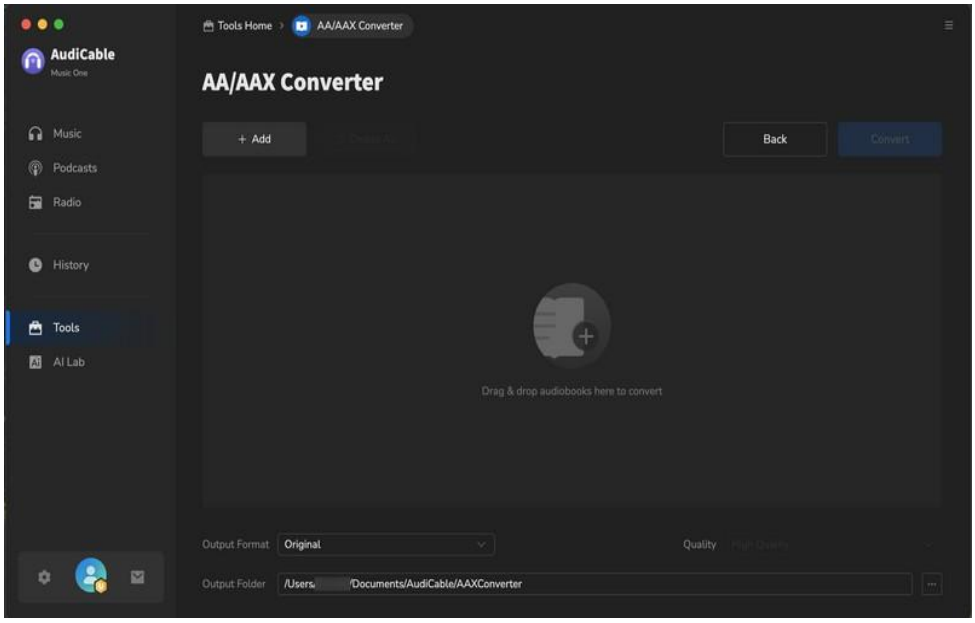
Use Format Converter

To convert the local tracks to other audio formats, go to **Tools > Format Converter**. Click +Add icon to import music from the computer, then select the output format. AudiCable support **MP3, M4A, FLAC, WAV, OGG, and AIFF format.**



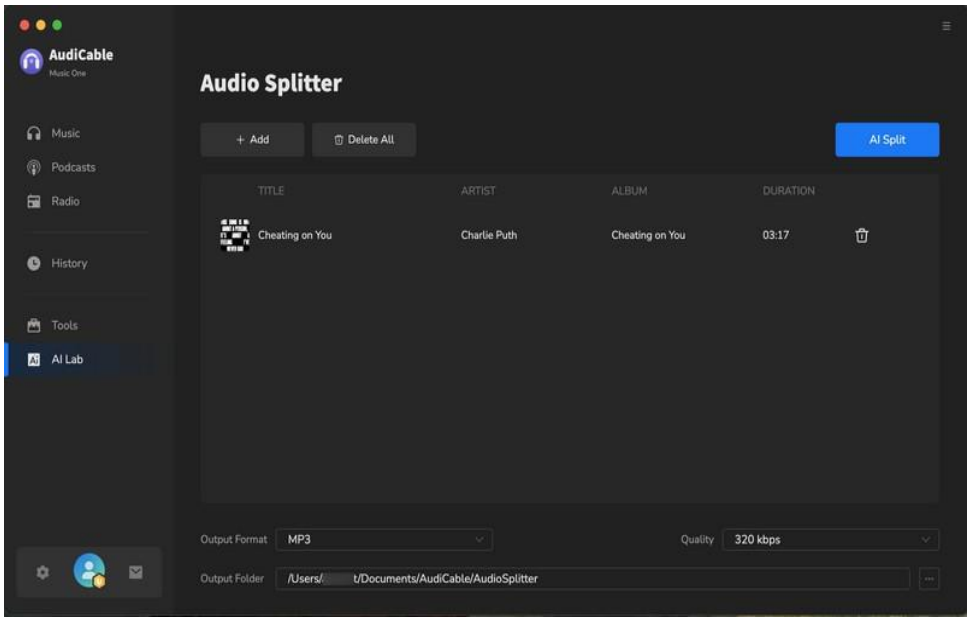
UseAA/AAX Converter

To convert local AA/AAX files, go to **Tools > AA/AAX Converter**. Drag and drop the local audiobooks to the parsing zone. Later select the Ouput Format, Output Quality and Output Folder to apply the changes.



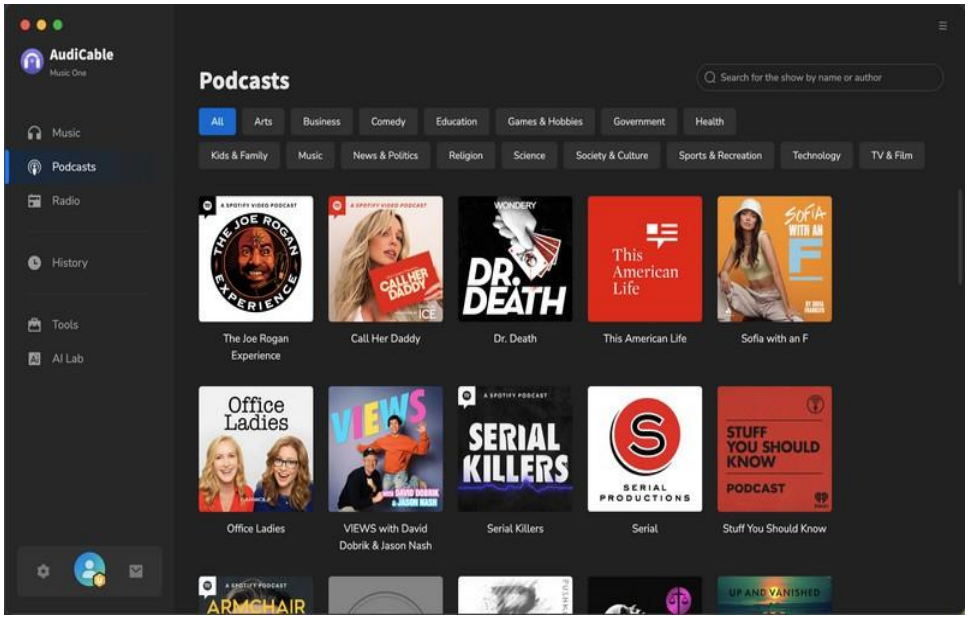
UseAIAudio Splitter

To remove vocals from any audio, click **Audio Optimize** on the left panel. Click the +Add button to import audio files, then the AI tool automatically separates vocals out of songs while keeping high audio quality.



Use Podcast Downloader

The built-in podcasts downloader supports playing and converting popular podcasts to local MP3, MP4, or other formats. Click "**Podcasts**" on the left panel, select the episode by genre, or directly query the show in the search box. Then click the download button, AudiCable will free download podcasts to computer at a fast speed.



Use Radio Recorder

The easy-to-use radio downloader effortlessly records online radio shows as MP3, AAC, FLAC, WAV, AIFF, and ALAC. Click "**Radio**" on the left panel, filter the radio station by country, or directly enter the radio name in the search zone. Then click the Click to Record button, AudiCable will download internet radio to the computer.
